

INTEGRATE

Edmentum programs within your digital ecosystem

We understand that Edmentum programs are just one of many digital tools being leveraged in your school or district. That's why we make it a priority to build partnerships with education technology providers for seamless data integration so that your teachers and students can spend more time teaching and learning.

Available Integrations (for select programs)

Student Information System (SIS) Integrations:

- Native API integrations with Genius and Maestro
- Google for Education
- Microsoft Office 365
- ClassLink
- Clever

Learning Tools Interoperability® (LTI®) Integrations:

- Blackboard
- Moodle
- Any LTI 1.1 or 1.2 certified LMS
- Canvas
- Schoology

Flexibility You Want, Support You Need

Edmentum provides the flexibility you need to integrate our programs with the other systems you already have in place. Our integration solutions include setup of testing and production accounts, an integration entry point with credentials, technical documentation and transition training, and ongoing support throughout the life of your account.

SIS Integrations to Automate User Management Tasks

Automatic data synchronization with your student information system (SIS) is an important component to ensuring a seamless implementation. Through our secure SIS integration partnerships with Clever and ClassLink, you can sync user records and other data like location changes and user activations. You can also automatically import and sync school, teacher, and student information.

Classroom Impact

- Automate time-consuming data entry and administration tasks
- Ensure accuracy of student data for consistent, meaningful record-keeping
- Overcome login credential confusion with single sign-on (SSO)
- Keep the classroom focused on teaching and learning

Use SIS Integration to Automate These Classroom Tasks

Create New Users

Add user information (name, password, grade, email, etc.)

Update Existing Users

Set users to active/inactive and edit user information

Roster Sections

Create classes based on schedule and enroll students

Deactivate Existing Users

Users who leave district will be deactivated and users returning will be reactivated

Tasks	Study Island	Courseware	Assessments	Exact Path
Create Users	✓	✓	✓	✓
Modify Users	✓	✓	✓	✓
Create Classes	✓	✓	✗	✓
Place Students into Classes	✓	✓	✗	✓
Move Students into Another Class	✓	✓	✗	✓
Move Students to a New Location	✓	✓	✓	✓

LTI Compliance to Manage Courses and Content

The Learning Tools Interoperability® (LTI®) standard allows Edmentum content and courses to be easily shared with your learning management system (LMS). You can browse, create, run, and manage our solutions at an individual module level throughout your LMS, saving you valuable time and streamlining the experience for your students.

Classroom Impact

- Present Edmentum content with a familiar LMS experience for your students
- Provide students with a consistent, easy-to-navigate learning experience
- Empower teachers to easily integrate Edmentum content into their own courses
- Reflect student progress in Edmentum courses through your LMS

Leverage LTI to Access the Following Activities Within Your LMS

Content Type	Status	Grade/Date Return
Modules (a package containing a tutorial, mastery test, and sometimes application items)	Modules containing a tutorial and mastery test may be assigned within the host LMS as an assignment which returns a single pass/fail grade.	A percentage grade is provided for completed modules. Modules reflect the score of the mastery tests. The score will be from the most recent attempt. Mastery tests may be attempted multiple times following completion of the tutorial or a manual unlock by an educator.
Pretests	Pretests may be assigned as an assignment in the host LMS. Assessments may not be reset and must be reassigned in the host LMS in order to be retried. Exemptive functionality is not supported by the LTI standard.	A percentage grade is returned to the host LMS when complete, assuming the host LMS is configured to receive LTI grades.
Post Tests	Post Tests may be assigned as an assignment in the host LMS. Assessments may not be reset and must be reassigned in the host LMS in order to be retried.	A percentage grade is returned to the host LMS when complete, assuming the host LMS is configured to receive LTI grades.
End-of-Semester Tests	End-of-semester tests may be assigned as an assignment in the host LMS. Assessments may not be reset and must be reassigned in the host LMS in order to be retried.	A percentage grade is returned to the host LMS when complete, assuming the host LMS is configured to receive LTI grades.
Adaptive Assessment and Credit Recovery Functionality (such as exemptions and prescriptions)	Credit recovery functionality, including exemptions, prescriptions, and Learning Path features are unavailable when utilizing the LTI standard.	The grade/date return category does not apply for this content.

Technical Experts, There for You

Our Technical Engineering and Services teams are committed to making sure that your implementation is set up for success. Our consultants have the knowledge to help you determine what kind of integration services your unique Edmentum implementation will benefit from and the expertise to make sure that the process goes smoothly.

Flexibility You Want, Support You Need

Our team will facilitate a multistep project management process during the first several weeks of your implementation to ensure that your integration aligns with your district goals, meets the needs of your technical staff and administration, seamlessly integrates into the classroom experience, and helps your instructional staff focus on the students. We will walk with you through the early phases of integration, including planning, provisioning and setup, data management, and verification.

Dedicated to Data Integrity

Edmentum is a proud member of the Project Unicorn Coalition, a first-of-its-kind initiative committed to the secure, controlled interchange of data within K-12 education. Prioritizing seamless integrations between our programs and district data systems is key to this effort.

We work hard to make integrations between Edmentum programs and other technology as seamless as possible. It's our goal to help educators and students keep their focus on teaching and learning.

— Jeremy Spivey

Edmentum Vice President of Customer Success

Recognizing Our Role in Your Digital Ecosystem for Education

At the classroom level, technology can be overwhelming. Zooming out to the district level, many districts are managing dozens (sometimes hundreds) of applications, systems, tools, and resources across grades, departments, classrooms, and buildings. At Edmentum, we recognize that our programs may play only a small role in this complex “digital ecosystem.” That’s why we work closely with schools and districts to seamlessly integrate our digital solutions and minimize time spent inputting student data to streamline the classroom experience—not disrupt the instructional day. Here is how Edmentum visualizes the integrated digital ecosystem:

THE DIGITAL ECOSYSTEM

PRODUCTION AND ASSESSMENT TOOLS

- Digital Resources
- Assessment Tools
- Media
- Data

LEARNING RESOURCES

- Digital Curriculum
- Alignment
- News & Announcements
- Standards
- Data

LEARNING MANAGEMENT SYSTEMS (LMS)

- Custom Content
- Communication
- Gradebook
- Classes
- Calendar
- Data

GOOGLE APPS & MICROSOFT OFFICE 365 FOR EDUCATION

- Collaboration
- Assignments
- Storage

INFORMATION SYSTEMS

- Schedule
- Transportation
- Enrollments
- Records
- Grades
- Data

Your Online Curriculum Partner

Edmentum is founded in innovation and committed to being a trusted partner to create successful student outcomes everywhere learning occurs. We can give you the resources and the expertise to leverage integrations that maximize the power of effective, interconnected learning solutions.

1. Analyze & Identify Integration Needs

Review current technology, discuss data needs, and determine goals

2. Determine Integration Timeline

Identify project team and clear steps for integration implementation

3. Set Up Integration

Complete all testing and training to ensure integration meets needs
